

Drive a Robot!

The Department of Computer Science and Engineering at Washington University are recruiting research participants to evaluate the effectiveness of game-based computer interfaces to remotely drive robots and use them to perform a series of tasks. The study will involve controlling one or more robots in a computer-game-based environment. No prior knowledge of robotics or gaming is required to participate in the study. The study will require about one hour of your time, for which you will receive \$10.
